

## **Addendum to G Scale Track Ballast System Instructions for POWDER ONLY OPTION using your own Grit.**

A sample of correct size grit is enclosed for comparison to G scale prototype size. Ask your local Feed Store for "Chicken Grit".

**Mix powder in a 1 gallon container as needed. Use 1 part powder with 3 parts (customer supplied) grit for best results.**

Do not pre-mix and let sit for long periods of time. Humidity will activate the powder adhesive and it will set up HARD and become unuseable for Track Ballast until you crush it back into granular form. Mix it 50/50 with fresh NEW mix and re apply for best results.

Call Gary Poague at 828-712-3429 anytime for questions or additional information, or see [www.locomotionworks.com](http://www.locomotionworks.com) Thank you.
